

People with the learning disability dyslexia have a distance towards the labour market. The Learning Gateway project is addressed to adults with learning disabilities and tries to enlarge every chance of success on the labour market.

Learning Gateway developed a methodology for employment guidance.

Count the number of times you answered yes.

Testing

This questionnaire is a detection instrument and does not make a diagnosis. When you have answered 9 times or more "yes" on the above questions, there is a suspicion of dyslexia.

For a diagnosis we would like to refer you to a Diagnosis Centrum.

Background detection instrument

This detection list for adults is formulated by the working group methodology of the project Learning Gateway. The list is based on the Adult Dyslexia Checklist of the British Dyslexia Organisation. See www.bdadyslexia.org.uk.
